Hi Keith:

It looks like all documents for 100 Ferguson are on the digital imaging system but the 690 E. Middlefield is currently being processed. We can get an estimate of when 690 will be complete if you want to come in for both at the same time. Let me know what you want to do with that.

As far as the specifics you've given below... we don't actually locate the specific plan for you. We will show you how to use the system and individuals look for what they need. Though I think we will have to set them up at a specific computer since they will need to export the information.

Let me know.

Best regards,

Shellie Woodworth

Hi Shellie -

I already drafted the email below for you prior to us talking so I'm just going to send as is so you have documentation. I understand after our conversation that you will allow us to copy the documents without me sending a formal 104(e) letter. Thank you very much!

I'm copying my contractor Angelo Villegas. Angelo will be the one coming to copy the documents once you advise when that can be down. If some of the files are off site and need to be recalled or not available until August when your digital upload is complete so be it. See below my signature block for a list of the docs we are interested.

Thanks Again, Keith

Good Afternoon Shellie,

I am the USEPA Enforcement Officer investigating contamination located near the MEW

Superfund site. Recently I had one of my contractors, Toeroek Associates, Inc. visit the City of Mountain View's Building Division to collect some files on a couple facilities located in Mountain View. I understand the City has a no copy policy without permission from the facility associated with them. The USEPA greatly appreciates that. However, under Section 104(e) of CERCLA, 42 U.S.C. §9604(e), EPA has broad information-gathering authority which allows EPA to require persons (including municipalities) to furnish information or documents relating to the nature or extent of a release or threatened release of a hazardous substance or pollutant or contaminant at or from a vessel or facility.

If you are unable to provide us the documents we have identified without a formal 104(e) letter please let me know as soon as possible and I will get one drafted and mailed. I always try to obtain documents without issuing a formal 104(e) as the letters tend to come across as contentious (e.g., they have fines and deadlines associated with them). However if your department will allow us to collect the documents (see list below) upon receipt of this email, I will have my contractor visit at a convenient time for you and we will make copies. They carry a letter which allows them to act as my agent.

Sincerely,

Keith

Keith E. Olinger, Enforcement Officer
